

Kiss n Cry With 2 Criteria

The screenshot shows the 'Live Control Panel' interface for a '2 Criteria Final with 16 Judges'. The interface is divided into several sections:

- Top Bar:** Shows '5' in a box, '2 Criteria Final with 16 Judges', 'Recall 0', 'Heats 1', 'Range 1 - 10', and a large score display showing '75', '85', '88', '89', '145', and '172'.
- Left Panel:** A list of events with columns for time, event name, and panel. The current event is '2 Criteria Final with 16 Judges' at 10:34.
- Center Panel:** A table of 16 adjudicators with their names and scores. The scores are: 1. Adjudicator 1 (97%), 2. Adjudicator 2 (97% 133), 3. Adjudicator 3 (97%), 4. Adjudicator 4 (90%), 5. Adjudicator 5 (100%), and 6-16 are blank.
- Right Panel:** 'Criteria Judging System 2 Criteria'. It includes a timer set to '1:30', a 'PRESS Scan Button ...' section with a list of items (1-5) and their scores, and a 'Combine Item Number' section with a list of items (6-10) and their scores.
- Far Right Panel:** A vertical toolbar with various icons for navigation and control, including a large '6' at the top.

The screenshot shows a large screen display for a competitor. The information displayed is:

- Competitor ID:** 145
- Competitor Name:** 蘇子晴 / 張容睿
- Rank:** RANK 2
- TQ(ps) Score:** 8.54
- MM(cp) Score:** 8.56
- Score:** XXX

Introduction

A 'Kiss n Cry' is when the competitors perform a solo dance and are judged for that performance. Their results are then immediately displayed on a large screen for public reaction. Of course, they either kiss or cry and acknowledge the public.

The 'Kiss n Cry' is a great way to acknowledge performances as well as create public interaction that could not be done in any other way. Traditionally this function was done using the 4 Criteria Judging System, however this does introduce a high level of complexity and requires that Adjudicators be expertly trained. The 2 Criteria Kiss n Cry function simplifies the process but outwardly produces a similar result for the large screen.

The Scrutineering Application, coupled with PowerPoint graphics can easily achieve the 2 Criteria Kiss n Cry. PowerPoint is used for the graphics output which means that users can easily change background graphics and logos to suit the competition.

Setting Up for the 2 Criteria Kiss n Cry

The Item will be a Final where the **Mode = W** (as set in the RunOrder DB), this is the 2 Criteria function that will then appear on the Judges Tablet. It makes no difference how the previous Rounds are processed, of course it may also be the case that there are no previous Rounds.

It is possible to set the **Range** in the RunOrder which will restrict the Adjudicators to a range of scores suitable for the standard and age of this Final.

When the Item is selected it will appear as shown below with the label **Criteria Judging System, 2 Criteria**.

The Order of the Solo Performances

The 2 Criteria Mode does not require any special process for selecting the order the competitors will perform, unlike the 4 Criteria Mode which does require the use of the Solo Heating function within the Scrutineering Application. As stated in the introduction the 2 Criteria Mode is a simpler process that displays all Competitor Numbers on the Tablet during all the solo performances, the 4 Criteria Mode does not.

Competition Organisers may choose to manually assign the order of solo performances, this could be done by a simple 'drawing out of a hat' scenario, or by using the Solo Heating function that we would use for the 4 Criteria Mode.

Accessing the Solo Heating function is done from the Live Control Panel (shown above) and selecting the **Heats Button**. NOTE: Select the Item before clicking the Heats Button.

The Order of the Solo Performances (continued)

The Heating form is used to generate Heats for the Numbers in the .lve file for the current Item. In this case we are ignoring this form and selecting one of the lesser used functions the 4 Criteria Solo Performance Order function. Click the WDSF+ button.

Number	Competitors	From
1	Fred Smith / Taronga Leela	
2	Harry Hampshire / Mary Pegasus	
3	Loki Williams / Suzi Wong	
4	Obe One Kenobi / Elizabeth McGregor	
5	Luke Skywalker / Penny Wilson	
6	Ruben MacDougal / Sally-Anne Fry	

Heat	Is Group	Dance	Competitor	Country
1	<input type="checkbox"/>	1	Fred Smith / Taronga Leela	
			0	
1	<input type="checkbox"/>	1	Harry Hampshire / Mary Pegasus	
			0	
1	<input type="checkbox"/>	1	Loki Williams / Suzi Wong	
			0	
1	<input type="checkbox"/>	1	Obe One Kenobi / Elizabeth McGregor	
			0	
1	<input type="checkbox"/>	1	Luke Skywalker / Penny Wilson	
			0	
1	<input type="checkbox"/>	1	Ruben MacDougal / Sally-Anne Fry	
			0	
*	<input checked="" type="checkbox"/>	0	0	
			0	

As already stated, this draw function is usually used for 4 Criteria events that have 5 Dances, but it is equally as easy to use this to generate a random draw for any other events including a Skating Final.

Simply select the **Solo** option for the Dances where the Solo performance will happen. For example, where there are multiple Dances in the Final, you could select the first and third Dances to Solo and the other to Group. This will do a random draw for the first and third Dances and provide a report for printing. Click the **Random Draw** button when selection is finished.

The Order of the Solo Performances (continued)

A random draw generated from an Item with a single Dance will appear like the screenshot below. It is possible to redraw the order if the Chairperson requires this.

Dance Order	
2 Criteria Final with 16 Judges	
<hr/>	
Waltz	
88	Loki Williams / Suzi Wong
172	Ruben MacDougal / Sally-Anne Fry
145	Luke Skywalker / Penny Wilson
85	Harry Hampshire / Mary Pegasus
75	Fred Smith / Taronga Leela
89	Obe One Kenobi / Elizabeth McGregg

In the scenario of 5 Dances and the first and third Dances are selected for Solo the report will look like the following screenshot. Ensure that you print enough of the reports for distribution to the competitors, Chairperson, MC, etc.

Dance Order	
2 Criteria Final with 16 Judges	
<hr/>	
Waltz	
75	Fred Smith / Taronga Leela
85	Harry Hampshire / Mary Pegasus
172	Ruben MacDougal / Sally-Anne Fry

89	Obe One Kenobi / Elizabeth McGregg
75	Fred Smith / Taronga Leela
<hr/>	
Slow Foxtrot	Group Dance
<hr/>	
Quickstep	Group Dance

Operation During the Final

In summary, the Scrutineer will:

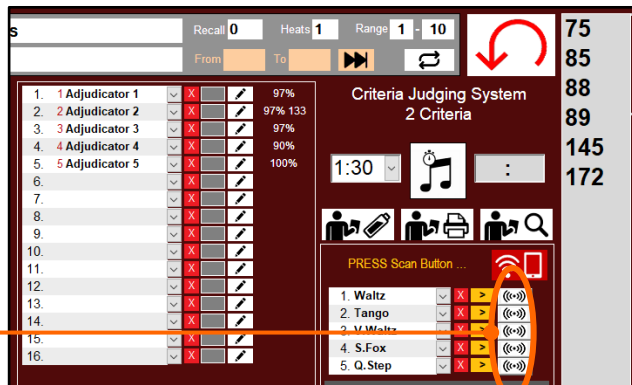

1. Select the Dance, ensure all Judges are Active,
2. Select the Competitor Number, watch for the Adjudicator Scoring that competitor
3. Process the 'Snapshot' of the Results,
4. Trigger the PowerPoint macro to generate graphics, and
5. Run PowerPoint Slideshow (F5) to display Results.

1. Select the Dance, ensure all Judges are Active

Select the SCAN button that corresponds to the Dance being performed.

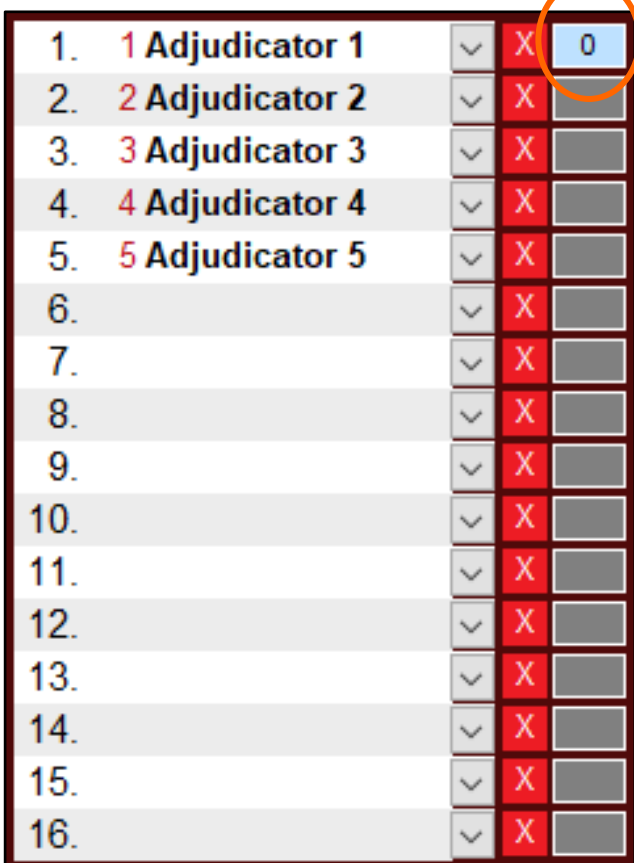

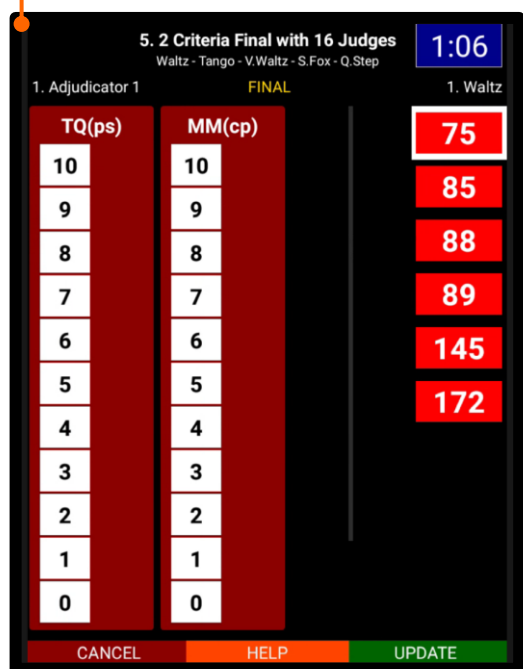

NOTE: This is NOT the Auto Scan button that would normally be used when monitoring an event.

For the Adjudicator their screen will look exactly the same as any other 2 Criteria Final.

As each Adjudicator logs into the Final an indicator box, coloured blue, will display next to the Judge's name.

This indicator should have a '0' zero, showing that no Scores have been selected.

2. Select the Competitor Number

All Scrutineers would be familiar with the Adjudicator Indicator Box, it is generally a quick reference to how many Competitor Numbers have been selected by that Judge. In the 2 Criteria Mode this indicator will display a '1' for each couple that has had both scores completed.

To see if a specific Competitor Number has been scored, the Scrutineer will select that Number in the Number List column. Let us assume that the first couple will be Number 88, below it is selected and now the indicators will only be looking for scores for that Number.

As the Adjudicators enter their Scores for Number 88, the indicators will show how many Scores have been entered for that number.

In this example, we see that Adjudicator 1 & 2 have entered 2 Scores for Number 88.

Adjudicator 4, only 1 Score, and Adjudicators 2 & 5 are yet to enter any Score for Number 88.

1. Adjudicator 1	X	2		
2. Adjudicator 2	X	2		
3. Adjudicator 3	X			
4. Adjudicator 4	X	1		
5. Adjudicator 5	X			
6.	X			
7.	X			
8.	X			
9.	X			
10.	X			
11.	X			
12.	X			
13.	X			
14.	X			
15.	X			
16.	X			

IMPORTANT!!!

The process should always be:

1. Scan the Dance, then
2. Scan the Competitor Number.

The reason for this procedure is that the system will write a small file that will then be picked up from PowerPoint. This file will contain the Dance & Competitor info which will allow the automatic loading of the result information into PowerPoint.

Operation During the Final (continued)

2. Select the Competitor Number

When the Scrutineer is satisfied that all Judges have given 2 Scores for the required Couple, it is time to PROCESS the Scores.

NOTE: The Adjudicators **DO NOT SAVE** the Scores, while the Solo performances are taking place, they simply select the Scores on the Tablet for that Number and the system will transfer that selection to the Scrutineering Application. Adjudicators will save the scores at the completion of the Dance.

TIP: If you have been using the Auto Print function for the events prior, now is the time to turn it off.

3. Process the 'Snapshot' of the Results

The Scrutineering Application has a special function that can Process a Result as a SNAPSHOT. This means a temporary result can be produced that only includes the current Dance and those Dances that have already been danced. In this way we can extract the **Kiss n Cry** data, the current **Dance Standing** and the **Overall Standing**.

To trigger SNAPSHOT PROCESS, click the  button adjacent to the Dance.

In our example, it will be next to the 'Waltz'.

1.	1 Adjudicator 1	▼	X	2	✎	66%

4. Trigger the PowerPoint macro to generate graphics

Before generating any graphics, your PowerPoint Application should be 'clean', that is there should be no slides from any previous event.

To trigger the macro, we will use the **View** command on the PowerPoint Menu.

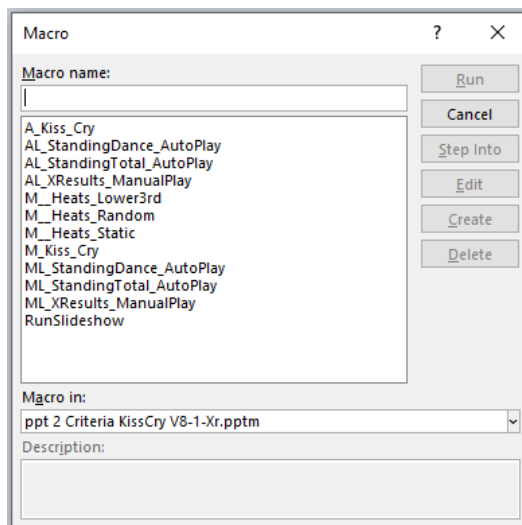

The View menu option will allow us to access the Macros Tab. Click the Macros icon.

The Macro menu will display all Subroutines stored in the Application.

The top macro ... A_Kiss_Cry, is the one we want.

Double click that macro, or one click to select then click the Run button.

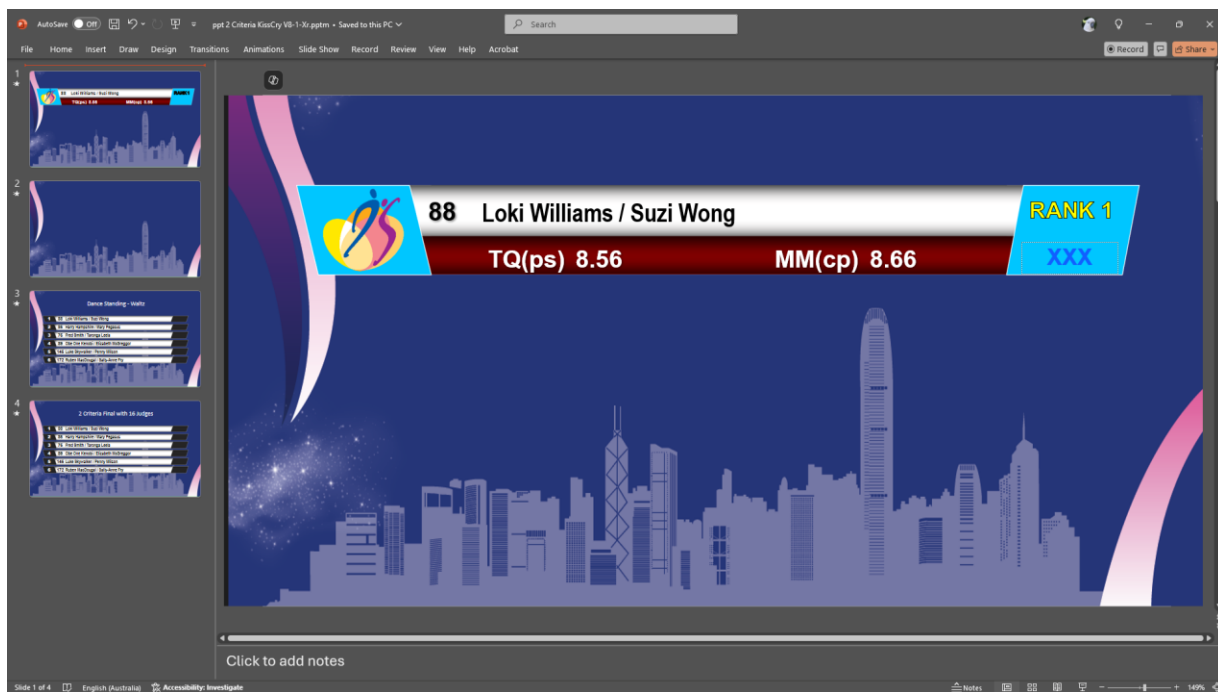

4. Trigger the PowerPoint macro to generate graphics (continued)

The slides will be generated from the information in the Current.txt file and the temporary Results. All these files are in your Server's C:\dancescore\Display folder. The PowerPoint Application should be running on your Server, if results are being produced on the Terminal, the Scrutineering Applications will automatically place copies on the Server.

NOTE: The Automated Kiss Cry macro will also generate the Dance Standing and the Total Standing slides. Both these slides will not be complete until the last Couple has performed and must not be displayed before that time. They are produced each time so that they are ready to go when needed at the end of the Dance.

Press F5 to start the slideshow

At this point the animation will pause waiting for input from the Scrutineer to proceed.

Tap the space bar to commence the Kiss n Cry animation.
